SOLUTIONS FOR THE ELECTRONICS INDUSTRY

Computers & office applications

INEOS STYROLUTION
Driving Success. Together.
HIGH QUALITY & DESIGN-ORIENTATED SOLUTIONS FOR COMPUTERS AND OFFICE APPLICATIONS

PCs, monitors, printers and copy machines – wherever you find electrical devices in your home or office environment, you will find our plastics. INEOS Styrolution’s resins stand out with a wide range of benefits that can hardly be matched by other materials.

PC & MONITOR

INES Styrolution’s product portfolio is optimally designed for electronic housings and range from affordable to advanced high-end solutions – simply everything to meet our customer’s needs.

Our styrenics offer a good balance of impact strength and processability, excellent aesthetics and high color consistency.

PERIPHERAL EQUIPMENT

Our styrenic products for periphery devices offer a good balance of impact resistance to meet the need for hard and durable surfaces and processability. Color consistency also ensures good surface.

COPY MACHINE

Our ABS and HIPS resins offer high gloss, color consistency, chemical resistance and a superb balance between flowability and mechanical properties such as impact and tensile strength.

PRODUCTS
Terluran®, Novodur®, Styrolution® PS, Luran® S, NAS®

KEY PROPERTIES
- High impact strength
- High gloss
- Color consistency
- Excellent aesthetics
- High color consistency
- Good surface

PRODUCTS
Terluran®, Novodur®, Terblend® N, Luran® SC

KEY PROPERTIES
- High impact strength
- High gloss
- Color consistency
- Excellent aesthetics
- High color consistency
- Good surface
